

Overview

This kit contains 30 pounds of ember rock used to adorn the firebox of the models listed below. Because this kit includes more than enough rock for every unit, we recommend extra rock be kept for future use.

Compatibility

- 3615, 4415, 4415 ST, and 6015 Fireplaces
- 616 DF Insert

Packing List

- 20 Pounds of Small Rock
- 10 Pounds of Large Rock

Quantity to Use

Use the quantity of each type of rock shown in the table below (use both large & small rock).

NOTE: If using log or stone media, reduce the amount of ember rock used.

	<u>Small Rock (2.5 cups per pound)</u>	<u>Large Rock (2.75 cups per pound)</u>
<u>3615</u>	7 Cups (2.8 lbs)	4 Cups (1.45 lbs)
<u>4415 / 4415 ST</u>	10 Cups (4 lbs)	5.5 Cups (2 lbs)
<u>6015</u>	12 Cups (4.8 lbs)	7 Cups (2.5 lbs)
<u>616 DF Insert</u>	11.25 Cups (4.5 lbs)	4.125 Cups (1.5 lbs)

Placing the Media

Place the ember rock in the same manner as the crushed glass (see manual for details).

- **Discard rock at the bottom of the bag that has disintegrated (turned to small, sand-like material)**
- **Put down small rock first. Discard any small rock that**
- **Do not place large rocks over any burner ports. This will cause sooting.**
- **3615 / 4415 / 4415 st / 6015 FIREPLACES:**
Use small rock only on the center channel.
- **Do not stack media in piles that may fall over or block airflow.**
